

# VP.INSIDER

A MAR-COMPLIANT WEB-SOLUTION  
THAT HELPS YOU KEEP EVERYTHING  
LEGAL

**vp.INSIDER is an online system that makes it easy for you to keep track of both insider registers and reports. You can also streamline and optimise your processes. vp.INSIDER gives you a clear overview and can easily fulfil your company's statutory obligations.**

### **Insider registre**

You can use vp.INSIDER to maintain all insider lists, both general and temporary. You can create insider reasons and register several simultaneous insider reasons. Insider lists in both Danish and English can be generated.

### **Data capture**

Data capture records all transactions that are registered for a managerial employee and his or her related parties. Data capture can be seen in vp.INSIDER immediately and concerns both registered and non-registered transactions. Finally, data capture is independent of the reporter's bank.

### **E-mail alerts**

Automatic e-mail alerts can be set up to notify trading periods and data capture of trades. They can be sent out automatically to specific groups, or manually to one or several recipients. All issues include logs and full traceability. The alerts can be sent in both Danish and English, with attached documents such as the company's rules for insider trading.

### **Workflow**

Workflow Premium is an automatic e-mail alert that is

sent on registration and "de-registration" to insider lists. The functionality makes it possible to avoid paper-based processes and optimally manage the insider processes. An e-mail alert can be set up for registration on an insider list with or without a receipt, and to obtain personal data directly from the insider.

The module can be purchased separately.

### **Reporting service**

The reporting process can be outsourced to VP INVESTOR SERVICES, where the report becomes a matter directly between VP and the managerial employee. The company itself thus does not have to be involved in the reporting process. VP can take over the task of reporting to the Danish Financial Supervisory Authority before the deadline.

### **Benefits**

- Online access and secure storage of sensitive insider data
- Full history and traceability
- Automatic data capture
- Automatic e-mail alerts
- Management of processes and activities
- Streamlining and optimisation of insider administration
- Reduction of operational risk
- Outsourcing of the reporting process, so that the company is not the reporting intermediary.
